# CARBON MONOXIDE POISONING

**Carbon monoxide detectors save lives. Every year, over 400 people die in the U.S., and 50,000 are treated for carbon monoxide poisoning. CO is a colorless, odorless, and tasteless flammable gas that is slightly less dense than air.**

*Household appliances, such as gas fires, boilers, central heating systems, water heaters, cookers, and open fires which use gas, oil, coal and wood may be possible sources of CO gas. It happens when the fuel does not burn fully. ... Fumes from certain paint removers and cleaning fluids can also cause CO poisoning.*

**The most common symptoms of carbon monoxide poisoning are often described as “flu-like”- headache, dizziness, weakness, upset stomach, vomiting, chest pain, and confusion.**

**TIP: Install a battery-operated or battery backup carbon monoxide detector in the hallway near each**

town hall

# TOWN HALL ISSUES

*(Submitted prior to 7 Jan 20)*

# SLEEPING POLICY – CYS CARE CENTERS

**QUESTION:** The toddlers are not being allowed to go back to sleep until lunch time at the child care centers on Fort Sill. My toddler is dropped off at 0530. When asked for the policy that says this is ok, they couldn't provide it. The kids are little and shouldn't be made to stay up when they already wake up early enough. From 0530 until lunch time is an extensive amount of time to expect toddlers to stay up. What is the policy in CYS child care centers concerning this?

# POSTING OF GARAGE SALE SIGNS

QUESTION: I live in government housing on Fort Sill. Can I post my garage sales signs on traffic poles and other places across the installation? I've seen it done by others, but I didn't think it was allowed. What is the policy here, as lots of people have garage sales from their homes when the weather warms up?

DO YOU HAVE A QUESTION YOU  
WOULD LIKE ANSWERED?

# FACEBOOK TOWN HALL
